

# HDHL-INTIMIC

non cofunded Joint Action:  
**STAMIFY “Standardised measurement, monitoring and/or biomarkers to study food intake, physical activity and health”**

## WHAT

The **STAMIFY call** is the 4<sup>th</sup> non-cofunded joint Action launched under the umbrella of ERA-Net HDHL-INTIMIC. The aim of this call is to support transnational research projects that develop improved methods and tools to assess and monitor diet and physical activity in order to provide better dietary and physical activity recommendations and guidelines.

## WHO

In total, 10 funding agencies from 8 countries (Austria, Belgium, Czech Republic, France, Germany, Ireland, Latvia and Spain) are participating in this call.

## HOW

The proposals should address at least one of the following topics:

- The development of improved methods for dietary assessment using new technologies, this can for example include ICT tools, unobtrusive data, food purchases, etc.;
- The further development of existing/identified biomarkers for food intake (e.g. combination of existing biomarkers to assess eating patterns and/or diet composition; validation of identified biomarkers taking into account influencing factors like gender, genotype or other individual variations);
- Identification of biomarkers of physical activities (also sedentary and sleep behavior) including the first step(s) of validation;
- Approaches to improve scientific application of commercially available devices for objective assessment of physical activity (also sedentary and sleep behavior) as well as develop approaches to process, aggregate and analyse such data in diverse populations;
- The development of integrative tools to assess and monitor both dietary intake and physical activity.

## WHEN

The call was launched on January 28, 2021 and consists of a two-stage submission procedure. Submission deadline of the pre- and full proposals is set on March 31 and July 22, 2021, respectively.

## FUNDING

The 10 funding agencies involved in this call have committed a budget of 5.8 Mio €.
